

EV CHARGER REBATE ELIGIBILITY CHECKLIST

Find out if your EV charger may qualify

Many Michigan homeowners and businesses qualify for EV charger incentives but miss them because the requirements are unclear. Use this quick checklist to see if your installation may qualify before starting your project.

Swift Energy Works – Your trusted EV charging partner across Michigan.

Quick Eligibility Checklist (2 minutes)

Check the boxes to see if you meet the basic requirements for an EV charger rebate:

Basic Requirements:

- I live in Michigan
- I am a DTE Energy customer
- I own or plan to purchase an electric vehicle
- I plan to install a Level 2 EV charger

Equipment Requirements:

- The charger model is on the DTE approved equipment list
- The charger will be installed at my home or business location

Installation Requirements:

- Installation will be performed by a qualified electrician
- Electrical permits will be obtained if required
- Installation will pass local inspection

Documentation Needed for Rebates:

- Itemized installation invoice (equipment and labor)
- Photos of installed charger
- Photos of electrical panel and meter
- Active DTE account in good standing

What If You Qualify?

If you checked several of the boxes above, your EV charger installation may already qualify for available rebates or incentives.

A quick consultation can help confirm your eligibility and identify the best EV charging solution for your property.

Working with Swift Energy Works ensures a smooth and efficient installation process.

Benefits of working with Swift Energy Works:

- Professional EV charger installation
- Guidance on rebates and incentives
- End-to-end support from consultation to installation

Ready to Move Forward?

Whether you're ready to install your EV charger or still exploring your options, Swift Energy Works can help you understand your eligibility and the best solution for your property.

Available rebates may be limited or time-sensitive.
